INTRODUCTION

■ BENGALCOTEX

ABOUT US

At BengalCotex, we are driven by a mission to redefine the standards of T-shirt manufacturing and exports through sustainability, quality, and innovation. Based in the cultural and business hub of Kolkata, India, we have established ourselves as a trusted name in the textile industry, catering to clients worldwide with premium-quality cotton T-shirts tailored for diverse needs.

FABRIC COMPOSITIONS

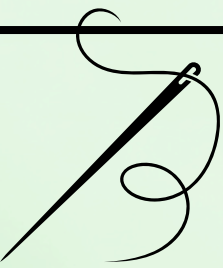

◆ Fabric Options We Offer:

100% Cotton (Best for Comfort & Breathability)

- Pros: Soft, breathable, and skin-friendly. Works well with screen printing and DTG (Direct-to-Garment) printing.
- Cons: Can shrink slightly after washing, wrinkles easily.
- Best for: Premium promotional T-shirts, event giveaways, and corporate branding.
- Recommended GSM: 160-180 GSM (for durability & quality).

65% Cotton / 35% Polyester (Best for Durability & Cost-Effectiveness)

- Pros: Combines cotton's comfort with polyester's durability, shrink-resistant, holds shape well.
- Cons: Less breathable than 100% cotton.
- Best for: Mid-range promotional T-shirts, bulk corporate orders, long-lasting use.
- Recommended GSM: 150-170 GSM (for a balance of comfort & affordability).

50% Cotton / 50% Polyester (Best for Moisture-Wicking & Cost Savings)

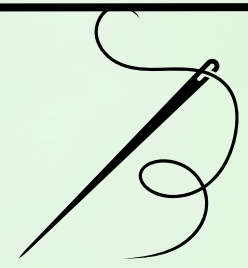

- Pros: Lightweight, moisture-wicking, dries quickly, highly durable.
- Cons: Less breathable than pure cotton, may feel slightly synthetic.
- Best for: Sports promotions, budget-friendly bulk orders, summer giveaways.
- Recommended GSM: 140-160 GSM (ideal for large-scale distribution).

100% Polyester (Best for Sports & Activewear Promotions)

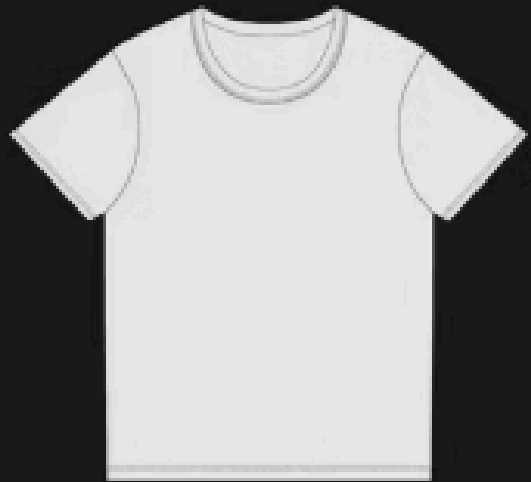

- Pros: Ultra-durable, moisture-wicking, doesn't fade or shrink.
- Cons: Less breathable, may feel synthetic, not as soft as cotton.
- Best for: Sports promotions, outdoor events, uniform T-shirts.
- Recommended GSM: 130-160 GSM (lightweight yet strong).

60% Cotton / 40% Polyester (Best for Printing & Versatility)

- Pros: Smooth surface for sublimation printing, screen printing, and heat transfer, offers softness with extra durability.
- Cons: Slightly more expensive than standard 50/50 blends.
- Best for: High-quality promotional T-shirts, detailed prints, retail-quality merchandise.
- Recommended GSM: 150-180 GSM (for superior print results)

VARIETY OF T-SHIRTS

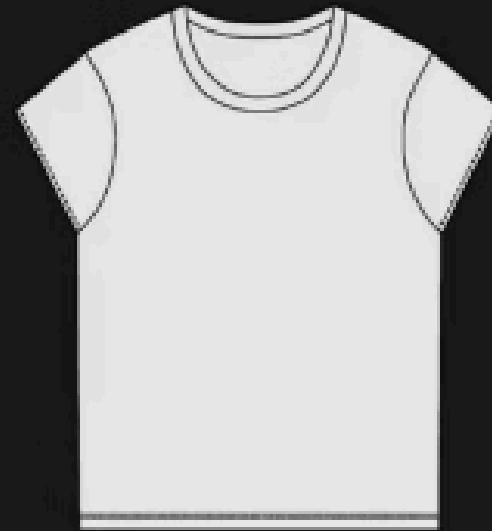

Classic Crew Neck T-Shirt

The half sleeve T-shirt that is an all-time favourite.

The V-neck Half Sleeve T-shirt

A great option of a classic T-shirt but with a V neck

INDIAN MEASUREMENT CHART

- Measure around shoulder blades, under arms and around the fullest part of the bust, holding the tape gently. Keep the tape straight and level.
- It is always preferable to know the sizes of the users. There are various brands, each following their own size specifications. Therefore, to avoid disappointment to the receiver their shirt size should be taken as irrespective of the brand, shirt sizes are standard and then the same should be converted into t-shirts sizes as per the table below.

#	Measurements in Inches									
1	T-Shirt Label Size	XS	S	M	L	XL	2XL	3XL	4XL	5XL
2	Normal Shirt Size	36	38	40	42	44	46	48	50	52
3	Chest Width	18	19	20	21	22	23	24	25	26
4	Length Height	25	26	27	28	29	30	31	32	33
